

## Deliverable 4: User Stories

Provide 3-5 detailed user stories following the required format.

1. As a learner, I want to be able to login and browse available coding challenges so that I can find relevant practice problems that match my skill level and learning goals.
2. As a learner, I want to see my progress dashboard with completed challenges, current streak, and points earned so that I can track my improvement and stay motivated.
3. As a learner, I want to be able to perform CRUD operations on my personal learning goals so that I can set, update, and manage my skill development objectives and milestones.
4. As a learner, I want to submit my code solutions and receive AI-powered feedback so that I can understand what I did well, identify areas for improvement, and learn best practices without waiting for manual code reviews.
